Nature Restoration

Serbian wetlands

Restoration of Karapandža wetland from
Gornje Podunavlje Special Nature Reserve

© WWF DCP

20,000 ha

THE LARGEST
FLOODPLAIN ALONG
THE DANUBE IN
SERBIA – 20000 HA
OF ALMOST INTACT
WETLANDS

Part of the trilateral transboundary floodplain spanning
Croatia, Hungary and Serbia.

Internationally recognized by Ramsar site, Important
Birds Area, Green Belt.

Proposed as UNESCO Biosphere Reserve.

Under threat – there is a need for restoration and
strengthening of the management practices.

Stronger involvement of local communities is required.

Potential actions – large impact wetland restoration

1,000 ha

RESTORATION OF A
1.000 HA LARGE
AREA BY
RECONNECTING IT
WITH THE NEARBY
NATURAL WATER
COURSE

15 million³

WATER
REPLENISHED
THROUGH
WETLAND
RESTORATION

20,000 ha

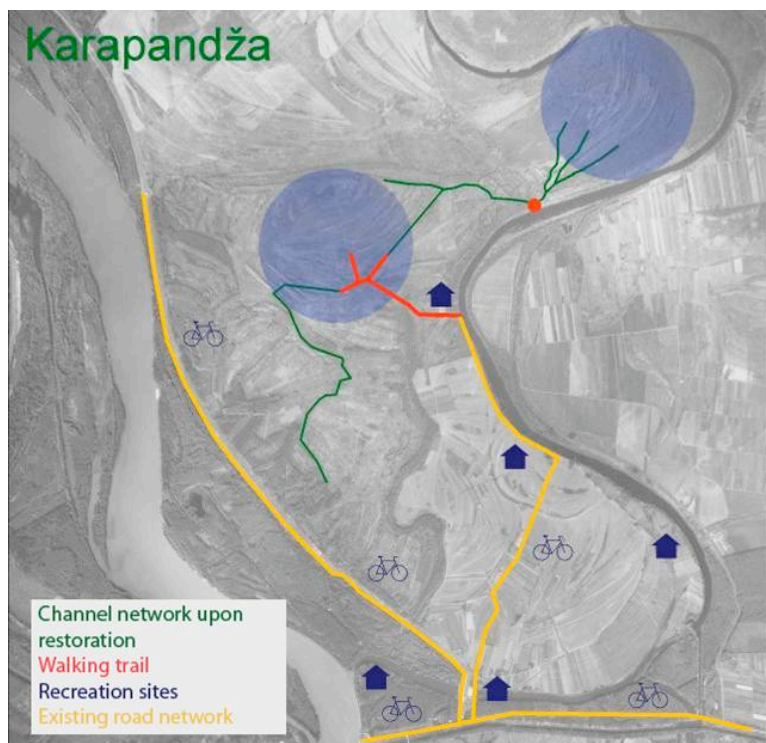

ENHANCED
ECOLOGICAL
STATUS FOR THE
20,000 HECTARES
OF THE
FLOODPLAIN AREA

Plan for future restoration efforts across the transborder Mura-Drava-Danube reserve consulted with relevant stakeholders.

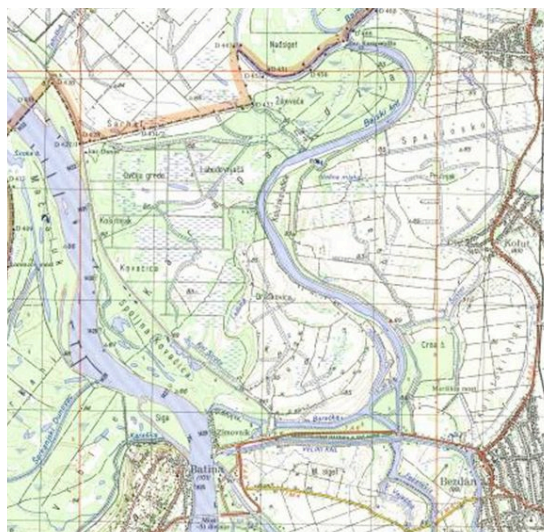

Specijalni rezervat prirode "Gornje Podunavlje"

* Poređivanje prema broju stanovnika u skladu sa podacima iz popisa stanovništva iz 1980. godine.

Preparation (e.g. feasibility, planning, consultation with local stakeholders) for a further restoration project.

Why we are here

To stop the degradation of the planet's natural environment and to build a future in which humans live in harmony with nature.
