Article about protected areas and climate change

© ADRIANO GAMBARINI / WWF LAI

Over the past decade, climate change has developed from being the minor concern of a few protected areas specialists to a headline issue.

WHO ARE WE?

The Living Amazon Initiative (LAI) is a well-integrated and strategic WWF Global Initiative that aims to inform and collaborate with civil society, governments and businesses about the importance of the Amazon and drive decisions and actions for a sustainable future of the region.

Improving cooperation on protected areas

Members of the WWF Protected Areas Community of Practice discussed how to improve cooperation between WWF offices.

WWF propone ways to boost the Brazilian Forest Code

A scientific article written by Leandro Castello and Marcia Macedo and published by Global Change Biology magazine analyzes drivers of degradation of freshwater ecosystems in the Amazon, evaluates impacts on hydrological connectivity, and identifies policy deficiencies that hinder freshwater ecosystem protection in the Amazon. To read the article go to: <http://bit.ly/1UJwdrT>

During the World Water Day 2016, WWF Living Amazon also called attention to the impacts caused on hydrological connectivity in the Amazon Basin. <http://bit.ly/1PyV4uC>

VIDEO

On Saturday, March 19, 2016, Latin America turned off its lights and monuments to shine a light on its natural wonders. Meet the exciting events of Earth Hour around the world.

PUBLICATIONS

The report State of the Amazon: Freshwater Connectivity and Ecosystem Health, launched by WWF Living Amazon Initiative in 2015, provides a comprehensive assessment of the current state of Amazon freshwater ecosystems and highlights text boxes presenting worst case scenarios and potential positive paths with integrated approaches for watershed planning and management for maintaining Amazon ecological stability.

The full report in Spanish can be downloaded at: <http://bit.ly/1WcxISb>
